

WE GET THAT YOU WANT TO SAVE TIME MANAGING GOOGLE WORKSPACE.

Amplified Collaboration
Lab Tools: Gopher Pack

Gopher Pack provides access to Gopher for Chrome Premium, Gopher for Gmail, Gopher for Users and Gopher for Groups. Gopher Pack is a collection of our best Google Workspace Admin and Chrome Device Management tools in an easy-to-use bundle.

Gopher Pack can help you achieve:

- Operational Efficiencies
- Agility
- Reduced Risk

Orchestrating the Right Solution

The Gopher Pack solution allows your organization to:

- Query, import and bulk update Chrome device OUs, asset ID, notes, and assigned users in the admin panel
- Capture and report on Chromebook metrics such as which user is on the device, for how long and their IP
- Remind students to keep Chromebooks updated to latest OS version
- Delete emails in your domain after phishing attacks, FERPA breaches or inappropriate sends
- Target and delete unwanted emails from user inboxes
- Create users from mapped CSV exports
- Update user properties and directory fields
- Reset and distribute student passwords to staff
- Control Google Groups at scale and fix inappropriate settings

CLIENT SUCCESS STORY

Organization: School district

CHALLENGE: As a small, independent school district, this client had a large number of free and reduced students. They were a designated BYOD and had a few laptop carts in the school buildings, but a lot of the students did not have access to technology at home. When the pandemic hit, the district provided Chromebooks for each student to use for remote learning, but needed a way to efficiently and effectively manage the fleet.

SOLUTION: The school district began its engagement with Amplified IT after discovering us at an EdTech training. They added Gopher Tools to their belt of resources, which included Gopher for Users (import and update user information in bulk), Gopher for Gmail (retract potentially harmful emails), Gopher for Groups (delegate group settings and access controls in Google Sheets), and Gopher for Chrome (manage Chromebooks). The district used Gopher for Chrome as its management system for student Chromebooks.

RESULT: With Gopher for Chrome, the school district was able to move from using a limited third-party tool to manage its Chromebook fleet, clean up its operating system, and sync its current device information to see it all in one place. Additionally, since the Google Admin console only allows for Chromebooks to be updated in limited batches, Gopher for Chrome enabled the school district to update its devices in bulk, significantly cutting the time needed to complete the process.
